

# Are you ready for a challenging opportunity?

MyPrivacy is a growing cybersecurity start-up specialized in advanced cryptography, based in Vienna, looking for an experienced

## Developer / Senior Developer

to complement our team and work together on our vision of making the public cloud a safe place.

### COMPANY – Who is MyPrivacy?

We are an Austrian cybersecurity start-up specialized in advanced cryptography. MyPrivacy *SafeSpace* is our product that can be used to protect any kind of data stored in untrusted environments like public cloud, providing the user total control over the data and complete anonymity.

If you are excited about automation, Cloud and DevOps culture, we might be a great fit! MyPrivacy was founded in 2018 and received seed funding from the Federal Ministry and aws (Austria Wirtschaftsservice), as well as funding from FFG.

### RESPONSIBILITIES – What will you do?

- Define and implement our REST APIs in Java/Spring Boot
- Develop the frontend interface of our product
- Participate actively in designing our software architecture
- Write and maintain unit/integration tests
- Take part in the development of a Rust/WebAssembly library
- Help implementing a cryptographic protocol
- Maintain repositories Continuous Integration
- Work hand in hand with the Operations team to assist in the design and deployment of our product

### SKILLS – What will you need?

#### Required:

- 3+ years developer experience
- REST API design and implementation
- Modern frontend framework experience (Angular, React, Vue, ...)
- Good knowledge of Version control (Git)
- Fluent English level
- EU visa

### Nice to have:

- C/C++/Rust/Go
- Java/Spring Boot
- ReactJS
- Cloud experience (AWS, Azure, GCP)
- Containerized application/Docker
- CI/CD (Gitlab/Github/Bitbucket/...)
- Worked in a Scrum project management team
- Testing/Mock framework and testing principles
- Basics knowledge of cryptographic functions

### BENEFITS – Why should you join?

- Small team where everyone participates in design and decision-making process
- Fast decision making and possibility to evolve rapidly
- Modern internal IT systems, high-end hardware equipment
- Trainings and education, including technical presentations twice a month
- Flexible working times, included home office days, work-life-balance
- Extra salary benefits (public transport card - Wiener Linien Jahreskarte, food vouchers)
- Well-equipped workplace (tea, coffee, kitchen, ...) in a charming office, 4 minutes walk from the main train station (Hauptbahnhof)

Minimum gross salary of € 44.660 p.a.  
(full-time, IT-KV ST1 Regelstufe) or more,  
depending on your experience and specific qualifications.
