

# Projekt Manager (m/f/x)

Vienna | Project Management | Full time | Part Time

Our mission is to build highly scalable and innovative data exchange solutions to empower data ecosystems. With the nexyo DataHub we offer software solutions to discover, publish and share data with the world to make use of data through a network.

## Your Mission

Joining us means becoming part of the team and contributing more than “just” project coordination. We are looking for someone who is passionate about managing the process of building products that customers love and brings a hands-on mentality to the table. You will become a crucial part of the company and will take over various tasks but focused on the product development.

## Your Profile

- Professional experience in (software) project management
- Proficiency in leading complex mid- or long-term projects
- Experience with software life-cycle processes and software development is desirable
- Knowledge of product development in a regulatory field is an asset
- Fluency in German and English
- Open mind-set and hands-on mentality

## Your Tasks

- Project management according to established guidelines and processes
- Ensure goals and timelines are met
- Coordination of tasks within the project team
- Communication with external partners
- Establish the required software and project documentation
- Your mission is to make data management and data sharing as easy as possible for customers

## Why Us

- A competitive financial package. The actual salary is based on your qualifications, and experience.
- You will join an amazing team of young and talented individuals with flat hierarchies and the possibility for you to shape the company and become a part of the core team.
- We appreciate our lives and therefore offer flexible working hours, family friendly work environment and home office options.
- Don't miss out on the most amazing regular team happenings.

**Sounds good? We are looking forward to getting to know you.**

### Let's start a data driven future:

We believe that we can create a new reality.  
A reality in which data is connected and creates value and innovation. A reality in which data becomes an ecosystem.
